

If you are choosing to use the car loop versus walking or taking the bus, please see the route below, and important reminders:

- Please do not block the bus loop openings when you are in car loop. Stop before you move forward to ensure you have space that does not block the bus loops.
- Please do not block the community driveways. Staff will now be directing cars at the middle school exit for car loop as seen below.
- Please have your students get out of the car when adults signal. For efficiency, do not wait for a staff member to open the door. For our younger students, we encourage families to practice opening the door. Staff members will assist if there are difficulties.
- Please do NOT get out of your car in car loop. It is not safe and holds up the car loop line.
- If you lose your number, please write in large print the number and name of your student and put it in your windshield.
- If you are picking up as an exception to your typical transportation, please have your child's name and grade written in large print on a piece of paper and put it in your windshield and notify your teacher.

Do not block.

Stay to the left in the middle school bus loop so that middle school staff and vehicles can park along their bus loop sidewalk.
